

Mohammed Ahbar Ajaib

AI Application Engineer | Full Stack Developer

+91 7411223375 | ahbarajaib@gmail.com | www.linkedin.com/in/ahbarajaib | ahbarajaib.com | Bhatkal, India

Professional Summary

AI Application Engineer with 5+ years of software engineering experience building production web applications and AI-powered products. Experienced integrating LLMs, implementing RAG pipelines, streaming responses, tool-calling workflows, and scalable backend APIs. Strong background in Node.js and modern frontend development with hands-on experience building AI assistants and production-ready business applications. Currently expanding production AI infrastructure expertise with FastAPI, vector databases, and agentic workflows.

Technical Skills

AI & LLM Engineering: OpenAI APIs, Anthropic APIs, Prompt Engineering, Tool Calling, Streaming Responses, Context Management, Retrieval-Augmented Generation (RAG)

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3

Backend & Systems: Node.js, Express.js, REST APIs, WebSockets, JWT Authentication, Async Workflows, API Integration

Databases: MongoDB, PostgreSQL, Prisma ORM

Tools & Platforms: Git, Postman, Firebase, Vercel, NGINX, Figma

Professional Experiences

Wordpress Developer

Feb 2025 – Present

Infinitus International FZE, Dubai, UAE.

- Built a full-stack, high-converting electronics e-commerce platform using WordPress (WoodMart theme), WooCommerce, PHP, and ACF, fully optimized for user experience and performance.
- Developed custom features including Buyback system, Repair booking, and Renewed phones section, integrating dynamic logic with JavaScript and ACF.
- Achieved 80%+ performance score on PageSpeed.dev through advanced optimization techniques including script deferral, lazy loading, and minimal plugin footprint.
- Ensured responsive, cross-browser UI with smooth animations using custom CSS and Elementor Pro.
- Customized checkout flows with conditional logic, cash discounts, surprise gift automation, and in-store pickup options using WooCommerce hooks and PHP.
- Implemented scalable backend structures with custom post types and bulk imports via Ultimate CSV Importer to manage thousands of device models efficiently.

React Native Developer

Aug 2024 – Jan 2025

Personal Project – Cross-Platform Mobile App, Dubai, UAE.

- Developing a robust React Native Expo application supporting both Android and iOS, focusing on seamless performance and user-friendly design.
- Utilizing TypeScript for scalable, maintainable codebases and developing reusable components for efficient development workflows.
- Implementing React Navigation for smooth navigation and Redux Toolkit for state management across the app.
- Establishing secure user authentication and authorization using Firebase Authentication and JWT.
- Integrating a backend built with Node.js (TypeScript) and MongoDB, ensuring reliable data handling and scalable architecture.
- Optimizing performance through lazy loading, dynamic imports, and caching strategies for faster load times.

Full Stack Developer

June 2023 - Aug 2024

Shahi Kohinoor LLC, Dubai, UAE.

- Built high-performance, responsive web applications using React and Next.js with efficient state management (Redux Toolkit).
- Designed reusable UI components and implemented responsive designs with Tailwind CSS for optimal performance across devices.
- Optimized application performance through lazy loading, caching strategies, and efficient frontend rendering.
- Built scalable backend APIs and business workflows using Node.js and Express with focus on maintainability and system reliability.
- Leveraged MongoDB for efficient data storage and implemented aggregation pipelines for advanced querying.
- Implemented real-time systems using WebSockets for interactive and streaming user experiences.
- Improved database performance through indexing and schema optimization for large datasets.
- Enhanced development efficiency by employing CI/CD pipelines, version control (Git), and cloud deployment on platforms like Vercel.
- Configured and managed servers with NGINX for optimized application delivery and performance.
- Regularly conducted code reviews and implemented unit testing to maintain code quality and ensure application reliability.

Full Stack Developer

June 2022 - May 2023

Freelance, Dubai, UAE

- Delivered end-to-end web development services for clients, crafting scalable and high-quality applications tailored to business requirements.

- Created dynamic, responsive, and interactive UI components using React and Tailwind CSS, ensuring cross-browser and mobile compatibility.
 - Designed robust backend logic with Node.js and Express, emphasizing modular architecture and secure practices like input sanitization.
 - Developed optimized database schemas in MongoDB, implementing efficient queries and aggregation pipelines for complex data processing.
 - Integrated secure authentication mechanisms with JWT for role-based access and user data protection.
 - Employed Git for version control and set up CI/CD pipelines (GitHub Actions) for automated deployments and efficient collaboration.
 - Deployed web applications on cloud platforms (e.g., Vercel) with a focus on reliability and scalability.
 - Worked directly with clients to understand requirements, provide regular progress updates, and deliver custom solutions aligned with their objectives.
 - Leveraged modern frontend build tools like Vite and Webpack to streamline the development process and enhance build efficiency.
 - Implemented WebSocket technology to enable real-time data updates, improving user interactivity in applications like live notifications and chat features.
 - Conducted extensive performance optimization, reducing unnecessary re-renders, and optimizing server responses for smooth user experiences.
-

Backend Developer

Oct 2020 - May 2022

DXC Technology, Bangalore, India.

- Utilized fundamental knowledge of application development using technologies like Node.js Express.js and MongoDB
 - Wrote clean, modular web-based applications in an agile and ever-changing environment.
 - Gathered and validated requirements as a part of collaboration for a progressive web application that helped develop clear, unambiguous technical requirements and establish a consistent feedback loop.
 - Coordinated with 2 other teams to identify customer requirements, creating 10+ BRD and tech documents that streamlined development activities.
 - Assisted in developing server-based Node.js applications by providing inputs and insights to increase the quality of overall work.
 - Delivered HTML5 application developed by other internal groups, gaining necessary expertise and skills in collaboration and communication.
-

Process Executive

June 2019 - July 2020

Infosys LTD, Bangalore, India.

- Helped customers solve their issues with their billing, bill cycle, plan change etc.
- Respond to telephone inquiries, providing quality service to customers and associates inquiring about the availability of products or status of orders.
- Listening attentively to the caller needs to ensure a positive customer experience.
- Demonstrated a talent for communicating effectively with customers from diverse backgrounds.

Projects

Premium E-Commerce Platform

Technologies: Next.js 16, TypeScript, Tailwind CSS v4, Prisma 7, PostgreSQL, Auth.js, Razorpay, Sharp

- Built a high-performance, full-stack e-commerce storefront and admin console featuring dynamic product variant selection, custom logistics configurations, and transactional database integrity.
 - Engineered an automated server-side image processing pipeline using Sharp to compress, resize, and convert media uploads into optimized WebP formats on the fly.
 - Implemented secure edge-compatible Auth.js configurations (Credentials & Google OAuth) and integrated Razorpay checkout flows with server-side webhook validation.
 - Designed a responsive, editorial-style user interface using Base UI headless primitives, featuring scroll-driven animations, dynamic viewport layouts, and Schema.org JSON-LD technical SEO.
-

AI CRM Assistant

Technologies: React.js, Node.js, Express.js, OpenAI API

- Built an AI-powered CRM assistant capable of analyzing customer and ticket data using OpenAI APIs and tool calling workflows.
 - Implemented conversation memory, streaming responses, and structured backend tool execution for real-time AI interactions.
 - Developed backend functions for customer retrieval and ticket analysis, enabling grounded AI responses using real business-style data.
 - Designed an interactive frontend with streaming UI and editable AI-generated responses.
-

Accounting App – Multi-Tenant Accounting System

Technologies: Node.js, Express, TypeScript, PostgreSQL, Prisma ORM, JWT

- Developed a full-stack multi-tenant accounting application with role-based access control and strict company-level data isolation.
 - Implemented comprehensive accounting modules (invoices, quotations, customers, suppliers, journal entries) with RESTful API and JWT authentication ensuring enterprise-grade security.
-

Ginni Rich – Electronics E-commerce(ginnirich.com)

Technologies: WordPress (WooCommerce), PHP, JavaScript & CSS

- Developed a full stack website for Electronics E-commerce using WordPress & PHP.
 - Ensured high-performance with about 80% on pagespeed.dev ensuring high performance rendering and smooth animation across browsers.
-

Focus Toolkit – Productivity App (Cross Platform)

Technologies: React Native, Node.js (TypeScript), MongoDB, Firebase, Expo.

- Developed a cross-platform app for time blocking and task management, offering real-time reminders and notifications.
 - Ensured high-performance rendering and smooth animations across iOS and Android platforms.
-

E-Commerce Platform for a Retail Trader(bigbasketuae.com)

Technologies: Node.js, React.js, Express.js, MongoDB, Redux, JWT

- Developed a comprehensive e-commerce platform featuring an admin dashboard, secure payment processing, and optimized search functionality, leading to a 15% increase in sales.

Car Wash Booking Platform (carveel.com)

Technologies: Node.js, React.js, TypeScript, Tailwind, MongoDB, Firebase Authentication, WebSocket

- Built a real-time car wash booking system with an intuitive interface and secure payment options, enhancing user experience and operational efficiency.

Landing Pages for Professional Portfolios (shahikohinoor.com/)

Technologies: Next.js, React.js, Tailwind CSS

- Designed and developed multiple responsive landing pages for professional portfolios, showcasing individual expertise and achievements.
- Implemented modern design principles, improving user engagement and visual appeal.
- Delivered optimized, SEO-friendly pages that improved visibility and user interaction by 25%.

Education

Master of Computer Applications, <i>RNS Institute of Technology</i>	June 2019
Bachelor of Computer Applications, <i>Anjuman Institute of Management & Computer Application</i>	June 2015
